

Improving space optimisation

Panasonic Mobile Parcel Cubing

Optimise warehouse space and accurately calculate vehicle loads in seconds, using Intel RealSense™, Panasonic TOUGHBOOK, and dimensional freight optimisation app technology.

KEY FEATURES

- Increase space utilisation within warehouse facilities and vehicle fleets
- Save on storage and transportation costs
- Faster fulfillment times

Whether its warehouses or storage facilities, space is a valuable asset. With the average warehouse utilisation at 68%, companies need to leverage on technological innovation to stay competitive.

Panasonic Mobile Parcel Cubing enables you to accurately calculate the size of your freight in seconds, receive directions on how much can fit into a given space, or how much space is being consumed.

Maximising your storage space and vehicle loads has never been easier. Now, with Panasonic's solution, you can expect to see an increase in efficiencies, savings on transportation costs and other expenses, and faster order fulfilment.
